Brief Scope of Work (60 words maximum):
 Project planning and design work and expenses for the upper Malibu Canyon tributaries project.

Funding Source Applied for: Proposition 84 Coastal Watersheds

Narrative/Project Description:
 The upper Malibu Canyon watershed with its far ranging tributaries ties together the whole central north-facing slope area of the Santa Monica Mountains. This ecologically unique and parklands rich area requires key acquisitions to complete habitat linkages between major blocks of public open space. Many longstanding Conservancy acquisition priorities are in this proposed upper Malibu Canyon tributaries project. Other agency, county and municipal interests warrants critical cross boundary project planning and design work.

The proposed project area included under this grant application encompasses more than 10 miles of blue line streams and approximately 200 undeveloped private parcels, totaling approximately 3,200 acres in the Santa Monica Mountains and Simi Hills. The project area would be contiguous with King Gillette Ranch, Las Virgenes View Park, Ladyface Mountain Open Space, Paramount Ranch, Malibu Creek State Park, and Liberty Canyon Open Space. It would also encompass the north-south Liberty Canyon wildlife corridor across the 101 freeway. The area is accessible from Agoura Road, Kanan Dume Road, Mulholland Highway, Las Virgenes Road and the Las Virgenes View Trail.

The attached aerial photograph shows the parcel specific boundaries of the proposed project area. The Mountains Recreation and Conservation Authority (MRCA) proposes to conduct planning and design work to acquire easements and fee simple parcels in this defined project area.
