Project Objective:

The proposed grant would fund project planning and design related to fee acquisition and capital improvements at an existing camp in unincorporated Los Angeles County. The Arroyo Sequit creek runs through the property, which also drains tributary canyons. Acquisition of the land would protect it from development and ensure public use, and allow for a multiple-objective project that incorporates stormwater management, nature education, revitalizes the area, and creates connections between recreational spaces and communities. Project planning and design work is required at this time to put together the justification for property acquisition, as well as identify opportunities for capital improvements and best management practices that would result in protection of the watershed's resources. *Attach additional pages as necessary
