Project Objective:

To create new public access and wildlife habitat along the Pacoima Wash by converting an approx. 1.5-acre vacant parcel owned by the City of Los Angeles into a multiple benefit natural park. The project will create a park with stormwater treatment, education, recreation, and habitat restoration components. The site is connected to ecologically significant habitat in the San Gabriel Mountains. The project is currently in permitting and needs additional funds to allow construction to begin once permitting is completed. This grant would close the funding gap.
